### New Smartphones with Windows Mobile 6 and microQ® Launched

Two trendy new smartphones enhanced by QSound Labs' microQ® digital audio engine and operating on Microsoft's Windows Mobile 6 have now been officially launched. Mio Technology recently released the Mio DigiWalker A702 GPS PDA phone, while BenQ has announced the launch of the super slim E72. Both phones boast an impressive range of multimedia functions and feature polyphonic ringtones enabled by microQ. Now optimized for most major mobile platforms, QSound's high efficiency processing microQ audio solution continues to gain implementation as the software audio engine of choice for many of the world's leading mobile devices.

The incredibly thin BenQ E72, at just over 1 cm front-to-back, packs all the functionality of an advanced smartphone in a super compact case with slick design touches like pulsing indicator lights beneath a mirrored surface. Powered by a Texas Instruments OMAP 1030 260 Mhz processor and aided by 128MB ROM and 64MB RAM, the E72 has a rich set of features and capabilities including quad-band GSM/EDGE connectivity for international roaming, Bluetooth 2.0 and WiFi with VoIP function. An easy to use MP3 player with support for WAV and WMA audio, plus the ability to record and send audio or watch streamed video makes the E72 a good choice for professionals who want to enjoy multimedia entertainment while having access to the powerful communications and productivity functions offered by the Windows Mobile 6 operating system.

**Mio A702**

The Mio A702 is a high-end quad-band GSM smartphone equipped with all-in-one capabilities including an exceptional GPS positioning and navigation system, a 3.2 megapixel camera with flash, geotagging of photos and a business card scanner. The A702 also features WiFi and Bluetooth connectivity as well as multimedia functions including a movie player and an MP3 player. Driven by a Texas Instruments OMAP 850 200 Mhz processor with Windows Mobile 6 Professional O/S and Office Mobile and Windows Live, the A702 is the perfect companion for business travellers. As one of the top three vendors of mobile devices with integrated GPS, Mio delivers with the A702, a powerful new smartphone with a compelling, unique feature set.
